As owner operators in the trucking industry it is important that we have instant traffic and weather available to us. We pay for these services through XM Satellite Radio to assure safety. What right does the National Association of Broadcasters have to dictate what we can use or are permitted to hear regarding our safety. I urge the FCC to reject the NBA 's petition 04-160 and to support XM Radio's ability to continue their fantastic programming.

Sincerely,

Jan Grew
